

AMAY HIEMATH

Pune, India • +91-9890250516 • LinkedIn • Portfolio • GitHub • LeetCode

CAREER OBJECTIVE

Software Engineer focused on backend development, scalable systems, and AI-powered applications. Skilled in Java, Spring Boot, REST APIs, SQL, and React. Built PromptPal, an AI-powered wellness platform leveraging RAG architecture. Seeking Software Engineering opportunities to build impactful products and solve real-world problems.

TECHNICAL SKILLS

Programming Languages: Java, C++, JavaScript, SQL.

Backend Development: Spring Boot, Spring Data JPA, REST APIs, JDBC, Microservices Fundamentals.

Frontend Technologies: React.js, HTML5, CSS3, JavaScript (ES6).

Databases: MySQL, Relational Database Design, Schema Design, Query Optimization.

AI & Modern Development: Retrieval-Augmented Generation (RAG), Prompt Engineering, AI-Assisted Development.

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks.

Development Tools: Git, GitHub, Postman, Linux, VS Code, Eclipse.

Software Engineering Concepts: API Integration, Debugging, Version Control, Integration Testing, Scalable System Design, Problem Solving.

PROJECTS

PromptPal: Personalized Skin, Hair and Body Wellness

Java, Spring Boot, React, MySQL

GitHub Repository

- Built an AI-powered wellness platform that generates personalized skin, hair, and body wellness plans based on user profiles, goals, and preferences.
- Developed scalable backend services using Spring Boot and REST APIs for user authentication, wellness analysis, recommendation workflows, and progress tracking.
- Implemented a Retrieval-Augmented Generation (RAG) based recommendation system using a curated wellness knowledge base to improve recommendation relevance and personalization.
- Designed and integrated MySQL database schemas for user profiles, wellness history, product recommendations, and tracking data.
- Developed an adaptive 15-day wellness journey system that dynamically evolves daily routines based on user progress and completion history.
- Built responsive React-based interfaces for wellness assessments, recommendation visualization, progress tracking, and personalized product suggestions.
- Utilized Git, Postman, and Linux-based development workflows for testing, debugging, and version-controlled software development.

ATM Simulator

Java, AWT, MySQL 2023–2024

GitHub Repo

- Engineered a modular ATM simulation system supporting login, deposit, withdrawal, balance enquiry, and transaction history using Java, JDBC and MySQL.
- Implemented transaction validation, exception handling, and reusable process flows to strengthen debugging, logical analysis and system reliability.
- Designed and managed MySQL relational database schemas for transaction handling and user authentication workflows.

Museum of Candy

HTML, CSS, JavaScript

- Designed and developed a fully responsive “Museum of Candy” website with structured layouts, interactive UI sections, and mobile-friendly navigation using HTML, CSS and JavaScript.
- Implemented smooth scrolling, animations, and modern frontend styling techniques to improve visual consistency, user engagement, and overall browsing experience across devices.

EDUCATION

B.E. Computer Engineering, D.Y. Patil College of Engineering and Innovation.

2022-2026

CGPA: 7.40/10 (Through Semester VII)

Relevant Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Digital Electronics.

HSC, Shri Shivaji Vidyamandir & Jr. College.

2022

SSC, Mar Ivanios Convent High School.

2020

CERTIFICATIONS & VIRTUAL EXPERIENCE

Walmart USA – Advanced Software Engineering Virtual Experience (Forage)

January 2026

- Implemented a customized heap-based priority queue in Java and designed UML class diagrams and ER models for scalable processing systems.

Database Structures and Management with MySQL — Meta

May 2026

Issued via Coursera

- Learned relational database design, SQL queries, normalization, joins, schema management, and MySQL database operations.
- Applied database concepts in backend-focused projects involving user authentication, structured data handling, and profile management systems.

Adobe Gen AI Certification — Generative AI concepts and AI-driven workflows.

Digital 101 Journey — Zensar Technologies, Nasscom Foundation, AICTE.

Infosys Springboard — Programming fundamentals and software engineering concepts.
